CERTIFICATE (On a Separate Page)

*Certificate of Summer Training from Company shall be attached herewith.

STUDENT DECLARATION

I, “Balwinder Kaur”, hereby declare that I have undergone my summer training at “TCI IT” from 1 June 2026 to 30 June 2026. I have completed a research project titled “Netflix Movies /TV shows Analysis” under the guidance of Ms. Priyanka Nehra.

Further I hereby confirm that the work presented herein is genuine and original and has not been published elsewhere.

(Student name and Signature)

FACULTY DECLARATION (On a Separate Page)

I hereby declare that the student Mr. / Ms. _____ of **Course (Semester)** has undergone his/her summer training under my periodic guidance on the Project titled “_____ (Project Title)”.

Further I hereby declare that the student was periodically in touch with me during his/her training period and the work done by student is genuine & original.

(Signature of Supervisor)

(Signature of Head of Department)

ACKNOWLEDGEMENT

I acknowledge with deep gratitude and thank the Chandigarh Business School of Administration, Landran whose course curriculum enhanced me to fulfil my **B.COM HONS.** and provided me with an opportunity to learn and complete my research.

I am thankful to **ANUP RANA, TCIL IT** for his trust and encouragement for successful completion of the research study.

I express my sincere thanks to my research mentor **Ms. Priyanka Nehra** , for providing me with the necessary guidance and facilities to complete my research. He /She has always been so kind to me, taught me knowledge and granted an awesome environment to my study and research. I'm so grateful for her encouraging support.

I would also like to thank all my teachers and professors whose unconditional support and guidance has helped me in completion of my research work. Last but not the least, I am thankful to my parents, classmates, and other friends for supporting me and their continuous help.

CHAPTER 1

INTRODUCTION TO COMPANY

Introduction to Netflix

Netflix is a global entertainment and streaming platform that provides movies, television shows, documentaries, and original content to subscribers worldwide. Founded in 1997, Netflix transformed from a DVD rental business into one of the largest online streaming services.

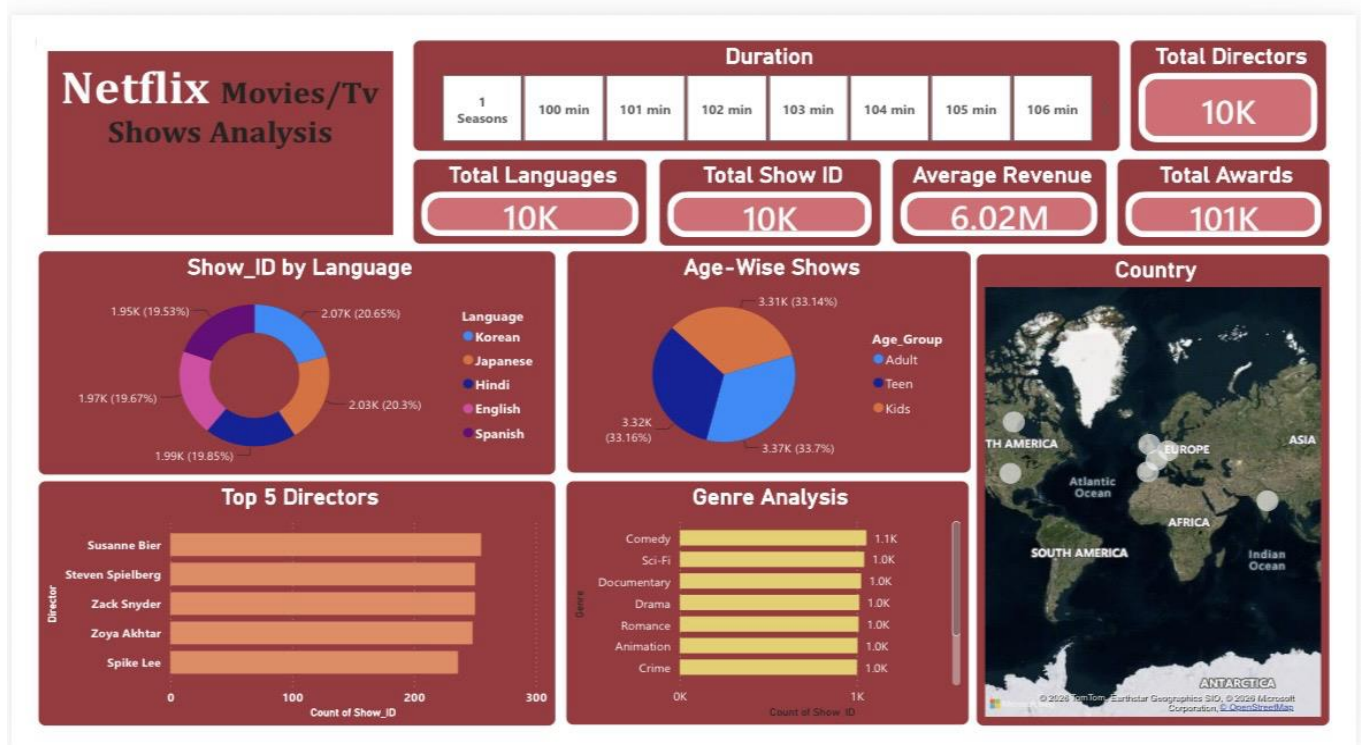

Netflix offers content across multiple genres, languages, and age groups to millions of users globally.

Company Overview

- * Industry: Entertainment & Streaming
- * Founded: 1997
- * Headquarters: California, USA
- * Services: Movies, TV Shows, Documentaries
- * Platform Type: Subscription Bas

CHAPTER 2

INTRODUCTION TO RESEARCH PROBLEM

Introduction of Research Problem

The digital entertainment industry generates large amounts of viewing and content data. Without proper analysis, it becomes difficult to understand audience preferences and content performance.

This project analyses Netflix Movies and TV Shows data using Power BI.

Research Problem

The major challenges include:

- Identifying popular genres
- Understanding language distribution
- Measuring content performance
- Analysing age-group preferences
- Tracking director contribution

CHAPTER 3

NEED, SCOPE AND OBJECTIVE OF THE STUDY

Need of the Study

- Understand Netflix content distribution
- Identify top-performing genres
- Analyse audience preferences
- Learn Power BI dashboard creation
- Improve data visualisation skills

Scope of the Study

The study covers:

- Genre Analysis
- Language Analysis
- Director Analysis
- Revenue Analysis
- Country-wise Distribution
- Age-wise Content Analysis

Objectives of the Study

- To Analyze Netflix dataset
- To Calculate total shows
- To Compare languages
- To Identify top directors
- To Study genre performance
- To Create an interactive dashboard

CHAPTER 4

RESEARCH METHODOLOGY

Research Design

Descriptive Research

Data Source

Secondary Data

The dataset contains information regarding:

- Show ID
- Title
- Director
- Genre
- Language
- Duration
- Country
- Age Group
- Revenue
- Awards
- Type (Movie/TV Show)

Software Used

Microsoft Power BI

Microsoft Excel

Microsoft Word

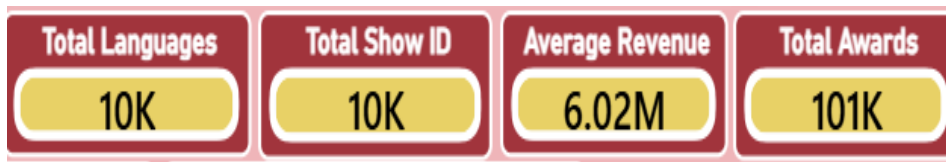

Data Collection Method

The sales dataset was imported into Power BI, cleaned, transformed, and analyzed using charts, KPIs, slicers, and filters.

CHAPTER 5

DATA ANALYSIS AND INTERPRETATION

1.KPI Cards

Purpose: Displays the overall performance of the Netflix dataset.

KPIs:

Total Directors: 10K

Total Languages: 10K

Total Show ID: 10K

Average Revenue: 6.02 Million

Total Awards: 101K

Interpretation: The KPI cards provide a quick overview of Netflix's content library. They show that Netflix has a large collection of shows available in multiple languages with significant awards and revenue.

2. Duration Analysis

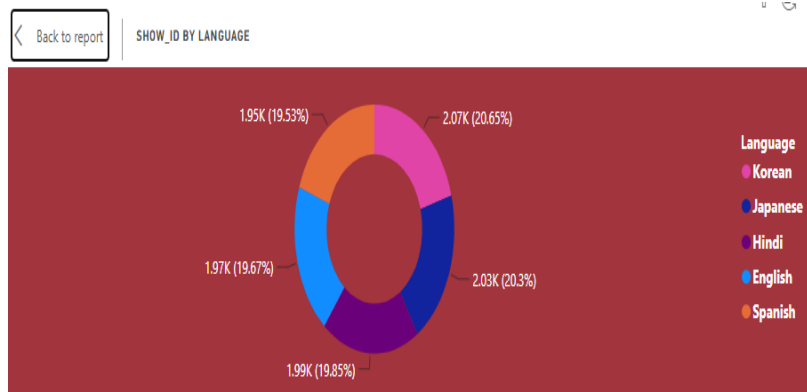

Purpose: Filters Movies and TV Shows based on duration.

Visual Used: Tile Slicer

Interpretation: Users can select different movie durations or TV show seasons to analyze specific content.

3. Language Analysis

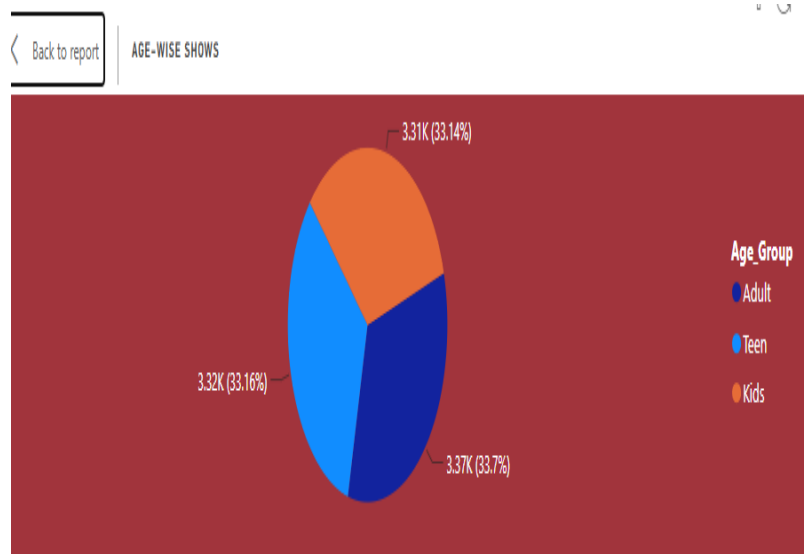

Purpose: Shows the distribution of Netflix content by language.

Visual Used: Doughnut Chart

Interpretation: Korean has the highest number of titles, followed by Japanese, Hindi, English, and Spanish. This shows Netflix offers content in multiple languages for a global audience.

4. Age-wise Analysis

Purpose: Displays content according to the target audience.

Visual Used: Pie Chart

Interpretation: Adult content has the highest share, followed by Teen and Kids content. Netflix provides entertainment for viewers of all age groups.

5. Country Analysis

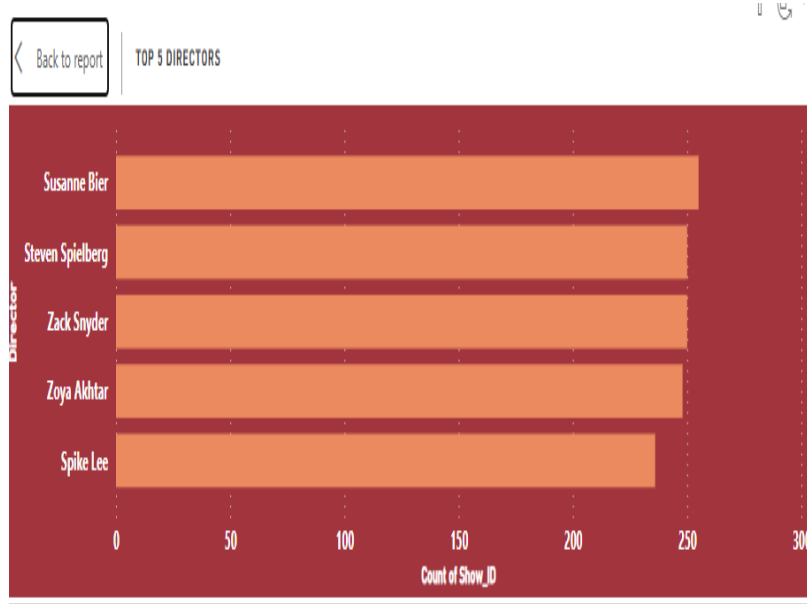

Purpose: Shows Netflix's content distribution across different countries.

Visual Used: Map

Interpretation: Netflix has a strong global presence, with content available in many countries around the world.

6. Top Directors Analysis

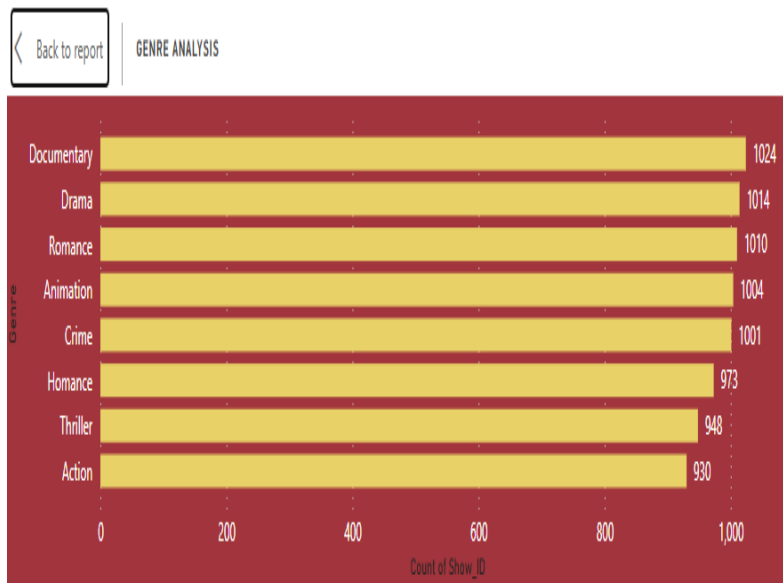

Purpose: Displays directors with the highest number of Netflix titles.

Visual Used: Bar Chart

Interpretation: The dashboard highlights the top five directors based on the number of movies and TV shows they have directed, helping identify major content creators.

7. Genre Analysis

Purpose: Shows the number of titles in each genre.

Visual Used: Horizontal Bar Chart

Interpretation: Comedy has the highest number of titles, followed by Drama, Romance, Documentary, Sci-Fi, Animation, and Crime. This indicates that Netflix offers a wide variety of entertainment Content.

CHAPTER 6

FINDINGS OF THE STUDY

The major findings of the Netflix Movies & TV Shows Analysis are:

- Netflix has a large content library with approximately 10,000 titles.
- Content is available in multiple languages, increasing global accessibility.
- Korean is the most common language in the dataset.
- Adult category contains the highest number of titles.
- Comedy is the most popular genre, followed by Drama and Romance.
- Netflix content is available across many countries, showing its strong global presence.
- The platform has around 10,000 directors contributing to its content.
- The average revenue is 6.02 million, indicating strong business performance.
 - Netflix productions have received approximately 101,000 awards, reflecting high-quality content.

CHAPTER 7

CONCLUSION , SUGGESTIONS AND RECOMMENDATIONS OF THE STUDY

Conclusion

Netflix analysis using Power BI helped convert raw data into meaningful business insights. The dashboard improved understanding of genres, languages, directors, and audience segmentation.

Suggestions and Recommendations

- Increase regional content
- Expand genre variety
- Improve recommendation systems
- Monitor global viewing trends
- Continue content diversification

APPENDIX

A. Sample Questionnaire

1. How often do you watch Netflix?
2. Which type of content do you watch most?
(Movies / TV Shows / Documentaries / Web Series)
3. Which genre do you prefer?
(Comedy / Drama / Action / Sci-Fi / Romance / Other)
4. Which language content do you watch most?
(English / Hindi / Korean / Japanese / Spanish)
5. Which age category content do you prefer?
(Kids / Teen / Adult)
6. Are you satisfied with Netflix content quality?
7. Which factor influences your content selection the most?
(Genre / Director / Ratings / Language)
8. Do you think Netflix provides sufficient content variety?
9. Would you recommend Netflix to others?
10. Which feature do you use the most on Netflix?
11. What improvements would you like to see?

B. Glossary of Terms

Term	Meaning
KPI	Key Performance Indicator
Power BI	Business Intelligence software
Dashboard	Visual representation of business data
Revenue	Total income generated from content streaming
Awards	Total awards won by shows/movies
Duration	Length of movie or number of seasons
Genre	Category of content such as Comedy, Drama, etc.
Language	Language in which content is available
Age Group	Target audience category
Director	Person directing the show/movie
Country	Country of content availability

Term	Meaning
Visualisation	Graphical representation of data

C. Abbreviations

Abbreviation	Full Form
ID	Identification
TV	Television
Avg.	Average
KPI	Key Performance Indicator
BI	Business Intelligence
No.	Number
Max.	Maximum
Min.	Minimum
